

# Practice Made Perfect

See the results you have been waiting for when you buy the Virtual Swim Trainer. This LED pacing system gives swimmers an advantage in workouts that will lead to big results at meets.

Patented US/Worldwide technology (US9095762B2 / EP2421618B1) helps swimmers visually understand if they are on pace with the time programmed or if they are going to slow or to fast.

The Virtual Swim Trainer is one continuous LED strip that is sealed in a silicon casing to protect it from the harsh pool environment, it is not made up of multiple sections that are connected end to end that could lead to chemical exposure and damage to the system.

## Virtual Swim Trainer

- Paces up to 6 swimmers within the same lane for 25 m/yd (each with a different color), 12 swimmers within the same lane for 50 m and up to 8 lanes at the same time.
- Portable system that can be left out year round and setup within 5 minutes or less with the help of swimmer(s).
- Easy to build your own workouts with the Swimming Session Creator.

## Virtual Swim Trainer ONE

- Single lane single pacing system.
- Capable of setting the pace for intervals, number of repeats and rest between repeats.
- Portable system that can be setup within 5 minutes or less.
- Rechargeable battery.
- Compatible with either a phone or tablet.
